How to connect to Wi-Fi

To connect safely to the Wi-Fi network within UvA buildings you need to activate the correct settings.

1. Do you already have an internet connection? If not, connect to ‘UvA Open Wi-Fi’ or ‘Amsterdam Science Park’. If you do, start with step 2.

2. Go to wifiportal.uva.nl

3. Please read the page carefully and follow the step-by-step instructions.

4. Enter your UvA-net ID (when requested) followed by @uva.nl and click on ‘JoinNow’.

5. The correct settings will be downloaded. You will be asked to enter the password of your UvA-net ID (up to three times).

You can now connect to the ‘uva’ and/or ‘eduroam’ network.

More info?
Go to wireless.uva.nl or visit an information desk at one of the study centres.
