

Summary of changes compared to the Faculty of Science Protocol of 23 June 2020

In the Faculty of Science Building Capacity protocol of 8 September 2020, the following changes have been made in respect of the Faculty of Science protocol established on 23 June 2020, on the basis of government policy, measures proposed by the UvA and the faculty and the experiences in recent months.

General principles:

- Self-isolation following orange travel advice

Any employees, guests and students who are visiting or returning from a country for which orange travel advice is in force (only essential travel) are urgently advised to self-isolate for a period of 10 days.

- Ventilation in UvA buildings

When using a building, it is recommended that the [UvA recommendations on ventilation](#) should be taken into account.

- Use of office reservation system

In all cases, staff members must reach prior agreement with their supervisor and institute manager about their on-site presence. The staff member then reserves an office space through the faculty's [office reservation system](#). This system takes into account the number of people that are able to make use of an office space under the guidelines (1.5 metres and ventilated). The supervisor and institute manager will monitor responsible use, both in terms of distribution across the building section in question and in terms of available company time.

- Events and meetings

No formal, informal or social gatherings and events are set to take place in Faculty of Science buildings during the month of September. The faculty will review this matter at the end of September 2020.

Faculty of Science building sections

- Faculty of Science building opening hours

Building sections	Opening hours
ASP904 A, B, C and D and E ¹	Mon-Fri from 07:00 to 22:00. Weekends from 10:00 to 18:00.
ASP904 F and G	Mon-Fri from 8:30 to 18:00. ²
ASP 107	Mon-Fri from 08:00 to 19:00.
Faculty of Science Pavilion ¹	Mon-Fri from 09:00 to 18:00.

- Brainwave

¹ Access to building section E only available with authorisation.

² Building sections F and G are only intended for practicals.

In principle, the Brainwave is closed. Any requests for exceptions to this closure may be submitted to gam-science@uva.nl. The maximum number of persons permitted in the Brainwave is 24.

- Offices

In ASP904, ASP107 and the Pavilion, the maximum number of persons per office space depends on the size, shape and ventilation of the room and on how well the 1.5-metre distance is observed. The guidelines regarding the maximum number of persons per room must be followed. For advice on this matter, please contact the Building, Occupational Health, Safety and Environment division (gam-science@uva.nl).

- Research areas

In the event that the guidelines cannot be followed, coordination should take place with the safety expert (gam-science@uva.nl).

- Lecture rooms

The layout of the lecture rooms may not be altered.

On the basis of the current rules, the faculty applies the following guiding principles regarding the timetabling of teaching:

- Education will be provided in the form of Blended Learning, with teaching (lectures and tutorials) taking place online to a large extent.
- Examinations and resits will be taken and administered online until further notice.
- When determining which activities will be held on campus, the following groups will be prioritised in the following order: first-year Bachelor's students, Master's students, second and third-year students.
