PUBLISHED BY THE FACULTY OF SCIENCE
IN COOPERATION WITH THE STUDENT COUNCIL

Especially made for
UvA science students

April 2022

Dear students,

This month we give you a look into two of the council's committees.

Faculty Education Committee

Within the Faculty Education Committee (CFO) we are concerned with subjects that are education-related and for all students of Science Park. We look at the Teaching and Examination Regulations of the faculty, also known as OER-A/TER-A, and make suggestions on it. We are, for example, also preparing a document in which all rights are stated for the students, we are looking at the extent to which internationalisation is a problem at the faculty and we would like to see extra support for resit students.

Programme Specific Committee

The TERs are in, so a busy period for the Programme Specific Committee (COO) has arrived. All programmes at Science Park have their own TER, which all need to be read and assessed by us to make sure you, the student, get the best possible TER. Besides the TERs, we also talk with all the Programme Committees to address points like the publication of marks, the course evaluations or where the Programme Committees can be of help to each other. Another big part of the daily business of the committee includes a lot of meetings with all sorts of staff at Science Park, including the dean and vice-dean.

Does this brief look into our activities make you enthusiastic? Then you'll be happy to know that you can become a member of next year's council! Join our Q&A event on the 8th of April in B0.112 or online to find out more. See you soon!

Kind regards,

Daan Jellema and Koen Oostinga
The Faculty Student Council FNWI 21/22

fnwi@studentenraad.nl or go to studentenraad.nl/fnwi

Sharing your knowledge

Enthusiastic about your study? Introduce children and secondary school students to your study subjects! Outreach organises activities such as forensic DNA lessons at secondary schools or

guest lectures on robotics. Questions? Contact Charlotte Clarijs: outreach-science@uva.nl.

Please note, all activities are in Dutch.

Be a part of The Noise Gap

AN INTERACTIVE ART PROJECT ON GENDER BIAS

Causes of the gender gap and manifestations of gender bias in science have been researched and confirmed many times. Even so, much about this topic goes unheard. To bring about change, you can be part of

The Noise Gap: an interactive audio artwork at the Science Park campus.

Would you like to participate in this project? There are several ways to do so:

- Record an abstract of a

paper on gender bias

- Record your own experience with gender bias

More ways to join The Noise Gap:

Check what you can do to help
uva.nl/ukraine

Online Minors Fair

Get inspired and discover which minor best suits your interests and goals. There are over 60 English-taught minors, and even more in Dutch.

Get Involved: Students for Sustainability Amsterdam

SFSA is a student-led organisation aiming to make the world a greener place by promoting sustainability. Read more about this initiative and/or sign up to one of their committees.

19 April: BetaCareer

Are you ready to expand your network, look for your future job or are you just curious what the business world has to offer? Download the app of the Beta Career Event, containing a great variety of businesses, and join the online event on 19 April.

Have your say at the UvA

Join your fellow students to help formulate UvA's vision to be the campus university of the future.
