

## Manual Virtual workstation (iOS - EN)

You can use apps.uva.nl to access your virtual work station. Here, you can view the same files – those on your network drive, for instance – as you would be able to see when logged into a UvA-computer. The first time you open apps.uva.nl, you will need to install an app called Citrix Workspace on your iOS device. This manual will show you how to install Citrix Workspace and how to launch the virtual work station on an iPhone or iPad.

Two-step verification is used when logging in. You can read more about it [here](#) as an employee and [here](#) as a student.

1. Open the **App Store**.

2. Search for **Citrix Workspace** and **download** the app.

3. You will not be able to open the program immediately after installation, but that is not necessary at this point. Instead, return to the home screen and open **Safari**.

4. Ga to <https://apps.uva.nl>. Log in using your **UvAnet-ID** and **password**. Approve the login request on your mobile device.

5. You will now receive a pop-up to download the ICA-file. Klik op **Download**.

6. When downloading is complete, press the **Downloads** button.

7. **Open the ICA-file.**

8. Workspace will now ask if you want to receive notifications. You can choose **Do not allow**.

9. You are now logged in and ready to begin using the UvA virtual work station.

## Log out

There are two ways to **log out**.

1. Open the **Start menu** and click **this button**.

2. Select **Sign out**.

1. Click **this button** on the taskbar.

2. You must confirm the choice before you will actually be logged out. Click **Yes**.
