

Changing your UvA-net ID password in the Windows Credential Manager

The Windows Credential Manager can save log-in names and passwords. If you use this feature, the passwords saved in it for the UvA-net ID will need to be changed. Use the instructions below to check whether the Credential Manager is active:

- Open the Start menu and click on *Control Panel*.
- Click on *User Accounts and Family Safety*.
- Click on *Credential Manager* and check if credentials are shown.

If no credentials are shown for any option, the Credential Manager is inactive and you do not have to complete these instructions!

If credentials are shown, complete the following instructions!

Credential Manager instructions

- The password needs to be changed at both Windows Credentials and Generic Credentials.
- Click on one of the arrows.
- Click on *Edit*.
- Change the relevant passwords and press *Save*.
