

Using Proctorio

What data are processed?

Name

First name, initials and last name

Email address

Image of the UvA student card

A picture, taken through the webcam of the students' device

Video and audio recordings of the student and the students' surroundings during the exam

These are recorded via the webcam of the students' device

On-screen activities while making the exam

Keystrokes and mouse clicks while making the exam

The IP address of the computer network to which the device is connected

The web pages the student visits during the exam

The students' answers to the exam questions

For the purposes of:

- Authentication
- Fraud control
- Time frame control

Where?

The personal data collected is stored on the service providers' (Proctorio) Microsoft Azure-servers in Amsterdam and München.

How?

Proctorio uses zero-knowledge encryption. This means that your personal data cannot be identified by Proctorio.
